RE: Coast Architects, Inc.

To Whom It May Concern:

My colleagues and I recently built a new dental office in Saraland, Alabama. Our existing 3000sqft office could no longer suffice for our expanding patient base. With the help of Coast Architects, we were able to design and build a state of the art, 12,000sq ft facility. Coast Architects not only designed a beautiful building, they did it on an amazing time schedule.

Our project was only possible because of the Gulf Opportunity Zone Act, which stated the office must be placed in service by December 31st, 2008. We sent Coast Architects some of our ideas in April, 2008, and they had preliminary drawings ready for our city planning commission meeting in 14 days! Our architect, Phillip Owens, attended the meeting and was instrumental in getting our plans were approved.

Without the quick work, flexibility, and professional support of Coast Architects, Inc., our project would not have been possible. Our facility is the most talked about project in our city, and is being considered for some local beautification awards.

I highly recommend Coast Architects, Inc., and would gladly work with them in the future.

Sincerely,

Leo F. Ginn III, DMD
